VARCOS
A Passage to Success

Our Students Speak up their minds..

Shweta Hebare
Trained on Functional Testing, Core Java, Selenium May20 batch

"I feel like I learned a lot from this course. Overall I really like this class because all lectures, assignments, and tests are straight forward.
To be honest , this was my first online class. The experience of this class has being nothing but positive.

After joining this course I got confidence on core Java. Now I can create my own writing script without taking help of google.
Actually Testing and Selenium were new for me ,but now I'm confident about these technology.

Rigorous home work and assignments gave me more confidence on hands on knowledge and the concept.

VJ sir's Style of teaching is awesome.
He always take care of ..every student, every one's concept must be clear."
