

Our Students Speak up their minds..

“I have learned many terminologies used in testing from this course along with some practical examples which otherwise would have been very difficult for us to understand by just reading the syllabus.

This course gave me enough confidence to crack the ISTQB Foundation Certification exam. The training material (slides) helped us to build the confidence as the points were very well elaborated during the session. Also, VJ sir did explain the points of earlier chapters as well whenever we had doubts.

After attending the session and going through the slides, it became easy for us to relate the points discussed in the session to the syllabus.

I will strongly recommend this training to other ISTQB aspirants.

I look forward for attending more training sessions with VJ sir if possible.

”
