

Supriya - Trained on Loadrunner, now working in a project as Performance Test Engineer

Our Students Speak up their minds..

“Training helped me to understand the concepts of performance testing. And I could apply them practically on Loadrunner. I am able to prepare moderate to difficult script and also able to do correlation and parameterization of that script. VJ sir’s teaching style is simple and good. PowerPoint presentations really helped me to understand the concepts easily. And daily assignments were also very helpful. Some topics were difficult to understand but VJ sir taught us same topic more than twice until the concepts were clear to us. Thanks to VJ sir and Varcos for the Load runner training ”
